Results are based on two-sided tests. For each significant pair, the key of the category with the smaller column proportion appears in the category with the larger column proportion.

Significance level for upper case letters (A, B, C): .05

a. This category is not used in comparisons because its column proportion is equal to zero or one.

b. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

CG1)) What do you consider to be the most important issue or concern facing [REG] today?

a. This category is not used in comparisons because its column proportion is equal to zero or one.

b. Results are based on two-sided tests. For each significant pair, the key of the category with the smaller column proportion appears in the category with the larger column proportion.

c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

CG1) What do you consider to be the most important issue or concern facing [REG] today?

a. This category is not used in comparisons because its column proportion is equal to zero or one.  
 b. Results are based on two-sided tests. For each significant pair, the key of the category with the smaller column proportion appears in the category with the larger column proportion.  
 c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

Results are based on two-sided tests. For each significant pair, the key of the category with the smaller column proportion appears in the category with the larger column proportion.

a. This category is not used in comparisons because its column proportion is equal to zero or one.

b. This category is not used in comparisons because the sum of case weights is less than two.

c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

**AB1)) If a provincial election were held tomorrow in Alberta, which party's candidate would you be most likely to support?**
