Results are based on two-sided tests. For each significant pair, the key of the category with the smaller column proportion appears in the category with the larger column proportion.

a. This category is not used in comparisons because its column proportion is equal to zero or one.

b. This category is not used in comparisons because the sum of case weights is less than two.

c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

Results are based on two-sided tests. For each significant pair, the key of the category with the smaller column proportion appears in the category with the larger column proportion.

a. This category is not used in comparisons because its column proportion is equal to zero or one.

b. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

AB2)) Even though you have not decided whom you would vote for, is there nonetheless a provincial party's candidate you think you might want to support or are currently leaning

The Republican Party of Alberta, led by Cameron Davies	.	a	a			a	a				B (.029)
Another party	.	a	a				A (.001) B (.000)		A (.001)		

a. This category is not used in comparisons because its column proportion is equal to zero or one.

b. Results are based on two-sided tests. For each significant pair, the key of the category with the smaller column proportion appears in the category with the larger column proportion.

c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

AB3) Thinking back to the last provincial election here in Alberta held in 2023, which party did you vote for?

Results are based on two-sided tests. For each significant pair, the key of the category with the smaller column proportion appears in the category with the larger column proportion.

a. This category is not used in comparisons because its column proportion is equal to zero or one.

b. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

A12) There may be a referendum held soon on Alberta separating from Canada. Based on how you feel today, would you vote Yes or No in this referendum?

Results are based on two-sided tests. For each significant pair, the key of the category with the smaller column proportion appears in the category with the larger column proportion.

a. This category is not used in comparisons because its column proportion is equal to zero or one.

b. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

Results are based on two-sided tests. For each significant pair, the key of the category with the smaller column proportion appears in the category with the larger column proportion.
a. This category is not used in comparisons because its column proportion is equal to zero or one.
b. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

AI3)) To what extent do you agree or disagree with the following statements about Alberta potentially separating from Canada?

	Total	VOTE PREFERENCE			VOTE LAST			DIRECTION OF ALBERTA		SEPARATION
